

## Adding Power Center Accessories

SunWize assembled Power Centers offer the best of two worlds; they are fully listed to UL 508A when they leave our shop and they can be customized for virtually any application. On the page below is a list of the most commonly ordered options which we install on OutBack Power Centers.

When ordering a complete assembly choose the base Power Center first (i.e. OBPP-VFX2812-2) and then add options as desired. Some options are limited to installation on full sized PSMP systems only. Charge controllers are installed with all necessary DC breakers.

**OFF-GRID  
SYSTEMS**

Part Number	Description	MSRP	Part Number	Description	MSRP
<b>AC Circuit Accessories</b>			<b>OutBack Controllers and Meters</b>		
7150PPO-24	X-240 Step Up Xformer	\$429.00	7150PPO-32	1 MX 60 on PSMP	\$919.00
7150PPO-43	X-240 Generator Balancing	\$429.00	7150PPO-33	2 MX 60 on PSMP	\$1,779.00
