SunWize Expands Solar Grid-Tie System Program

Kingston, NY, October 8, 2005 – In response to the growing demand for SunWize® Grid-Tie Systems (GTS), SunWize Technologies announces expansion of their GTS program for residential and commercial buildings. The company recently added engineering, marketing and sales resources dedicated to quality grid-tie systems and installations. The new program includes new sales and marketing tools for dealers and installers as well as new GTS models.

Designed for renewable energy installers, electricians and general contractors, SunWize GTS packages include all the components necessary for a successful installation except the home-run wiring. "The installer does not have to specify individual components, choose correct wire sizes, nor leave the installation site to purchase parts. The purchaser simply chooses from 100 packaged models and orders one part number," stated Luc Collin, SunWize GTS Design Engineer

In addition to UL listed inverters and modules, each SunWize Grid-Tie System includes mounting hardware, cables, hardware and electrical components. An optional, utility-grade kWh meter is also available. Complete installation and operation manuals assist with permitting and inspections. For GTS program and product information, contact Ezra Auerbach, tel: 877-657-6527 or ezra@lincsat.com.

About SunWize

SunWize Technologies, a solar technology company, specializes in the design and manufacture of integrated solar power systems, and associated project development and product distribution. The company operates a manufacturing/distribution facility in Kingston, NY and a distribution center in Oxnard, CA. www.sunwize.com
