New SunWize Solar Modules Receive FM Approval
Competitively priced solar modules offer 25-year warranty

Kingston, New York, April 12, 2005 –SunWize Technologies announces that their new SW line of single crystalline modules received FM approval for Class I, Division 2, Groups A, B, C, and D, Hazardous (Classified) Locations. The new SunWize solar line includes 50, 55, 60 and 100-watt modules in addition to the standard 85, 90, 115 and 120-watt modules. Also FM approved is the OEM line from 5 to 40 watts. All SW modules are rated at +/- 5% of the listed output and have a 25-year, 80% power output warranty. Accessories include SunWize mounting hardware, interconnects and the SWIL6 voltage regulator, all sold separately or in module kits. Bruce Gould, VP Sales, commented, “These modules are competitively priced with very tight power rating tolerances and an exceptional warranty. They now are an integral part of our line of solar power solutions for our industrial markets.”

SunWize high quality modules include an impact resistant glass front, Tedlar® back, EVA encapsulate, anodized aluminum tubular frame with pre-drilled mounting holes, and blocking diodes contained within a weather-resistant junction box. The SWIL6 voltage regulator, for systems rated up to 55 watts, is fully encapsulated, making it intrinsically safe for Class 1, Division 2 environments. The entire SW line is stocked at both SunWize distribution centers in New York and California.

SunWize Technologies, a solar technology company, specializes in the design and manufacture of integrated solar power systems, and associated project development and product distribution.
