TURN KEY POWER SYSTEMS

STAND ALONE SOLAR

SunWize stand-alone off-grid solar power systems are custom engineered to provide continuous and reliable power to remote site loads. These systems are custom designed based on the solar available at your location, and the power requirements of your load. They can be paired with any alternate power source such as a generator wind turbine or fuel cell to create a hybrid power system.

POWER BACK-UP SYSTEMS

SunWize Power Online Systems are complete, integrated battery backup UPS systems designed for site loads requiring 12/24/48VDC or 110V-240V, 50Hz/60Hz AC voltage. These systems are custom designed to easily integrate with your equipment and to meet your exact system requirements and specifications. Designed to withstand harsh environments and provide reliable power for continuous power loads.

PRE DESIGNED SYSTEMS

Our Power Ready Express line are complete solar systems that ship quickly and include everything necessary to run your equipment. Standard systems come with solar modules, a side of pole mount, a pole-mounted enclosure, a pre-wired control panel with a solar charge controller, and batteries. We offer a variety of optional plug-and-play accessories for AC loads, remote monitoring, and much more.
