

12V DUAL-MODULE PVK SOLAR POWER KITS

270613 / 270615

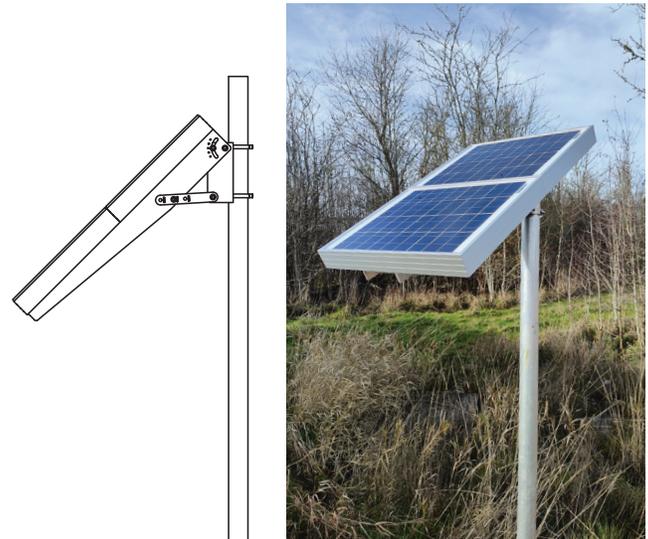

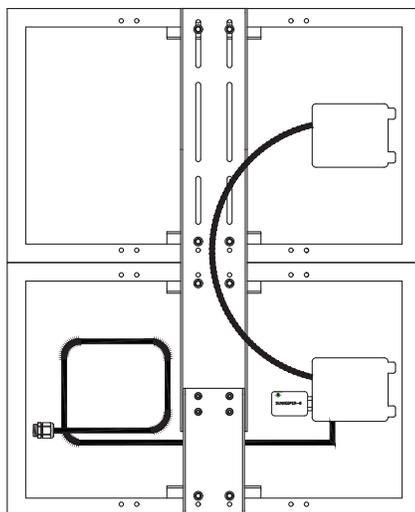

SUNWIZE 40W AND 60W PVK SOLAR KITS

The SunWize PVK 40W and 60W dual panel solar power kits with side-of-pole mount include two solar modules, a Morningstar 6A charge controller, and a pre-wired cable output. The Morningstar SunKeeper SK-6 controller is epoxy encapsulated, rated for outdoor use, and mounted directly inside the solar module junction box, providing a weather-tight connection without the need for additional housing while supporting long-term battery health in small solar power applications. The PVK kits are intended for low-power loads, typically under 5 watts at 12V, and are well suited for charging and maintaining battery banks up to approximately 40Ah, depending on site conditions and duty cycle.

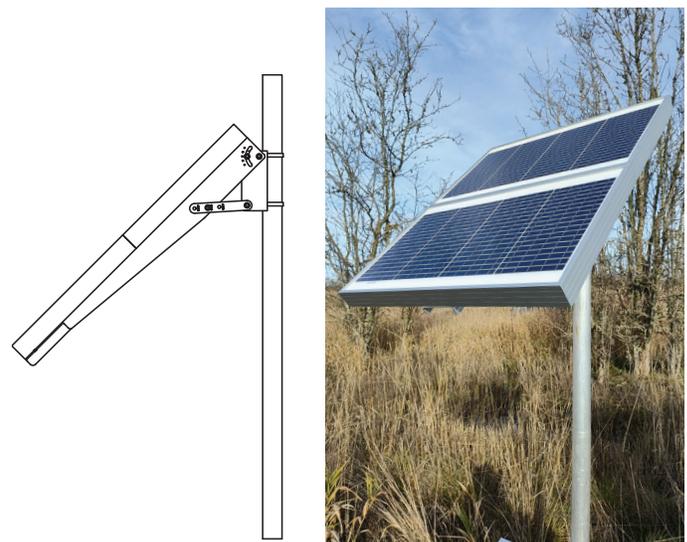

Both PVK kits feature a single-arm, side-of-pole mount designed to meet established industry practices, with thousands of units installed worldwide. The mount accommodates 2"-4" or 2"-6" diameter SCH40 poles, with standard banding provided to support this range.

FEATURES:

- Pre-wired configuration for simplified setup
- Two 12V solar modules, UL listed and C1D2 rated
- Integrated 6A, 12VDC charge controller ([003258](#))
- 18 ft, 14 AWG tray cable connecting controller to load
- Aluminum, adjustable side-of-pole mount
- Installation guide

270613	PVK 40W, 12V with SOP Mount	
H x W x D	27.0" x 17" x 3"	686 x 432 x 76 mm
Weight	15.0 lbs	6.8 kg
Array	40W	12V, C1D2, UL
Mount	Single arm	27" (240123)

270615	PVK 60W, 12V with SOP Mount	
H x W x D	32.5" x 26.5" x 3"	824 x 670 x 76 mm
Weight	22.0 lbs	10.0 kg
Array	60W	12V, C1D2, UL
Mount	Single arm	32.44" (240122)
